EXPERIENCE

Manipal Academy of Higher Education, Dubai — *Research Assistant Intern*

July 2020 - August 2020

During this internship, I learned how to design forward and reverse PCR primers that were used for a Genetic Association Study.

EDUCATION

GEMS Modern Academy Dubai, Nad Al Sheba - 3 — *High School Diploma*

April 2008 - March 2022

University of Alberta, Edmonton — *BSc Science*

September 2022 - Present

I am currently enrolled at the University of Alberta and have been working towards getting my bachelor's in science majoring in Immunology and Infection.

ACADEMIC ACHIEVEMENTS

- I graduated high school with an overall average of 93.75% in the 2021-2022 ISC Board Examinations.
- I scored 95.6% overall in the 2019-2020 ICSE Board Examinations.

EXTRACURRICULARS

- I was a part of the school's Marching Band from 2018-2019.
- I was a part of the school's Badminton team and participated in various inter-school tournaments between 2016-2019.
- I participated in the Duke of Edinburgh Bronze Award Program in 2018.
- I was a part of the social media team of my school's Eco Club in 2020.

PROJECTS

The Culture Cafe — *High school culture club*

October 2020 - May 2021

I co-created the school's culture club and was the graphic designer for the club's instagram posts [@theculturecafe](https://www.instagram.com/theculturecafe) .

VOLUNTEERING

- I helped organize and bake pastries for a bake sale in school to raise money that was donated to Dubai Cares in 2018.
- I participated in a social outreach program called "CONCORSUS 2018", that was organized for the children of determination from the Al Noor Training Center.
- I volunteered for the Emirates NBD Desert Cleanup Drive in 2019.

SKILLS

- I can speak fluent English as well as a bit of conversational Hindi.
- Having taken a couple of classes with lab components in University of Alberta, I have become accustomed to working diligently and with caution in environments that require a high degree of discipline and protocol-following.
- Working in a lab with other students has taught me how to work in a team and resolve any conflicts as and when they might arise.
- Working in a lab has also given me the ability to manage my time and be thorough in my work even in fast-paced and stressful environments.
- Having been on the social media teams for two of my high school's clubs, I have a good amount of computer and media literacy and can adapt to new technology when needed.
