SKILLS

- Leadership
- Communication
- Teamwork
- Time Management
- Problem Solving
- Heavy lifter

LANGUAGES

- English - Fluent
- Spanish - Beginner

BAYDEN DEPRADINES

PROFILE

Motivated student athlete looking for opportunities to work in the restaurant industry. I am looking to gain new work experience as well as certain skills that will not only benefit me in my future career but also as a contributing individual to society. An example of a skillset I would like to enhance would be my work ethic in a pressure filled environments. I enjoy spending my spare time participating in activities like organized sports, learning Spanish, and spending time with family and friends among other things.

WORK EXPERIENCE

- **EMSA - Edmonton Minor Soccer Association** 2022 - PRESENT
Youth Referee
 - While working here, I developed and demonstrated my leadership qualities including my ability to perform when presented with a stressful situation.
 - I also developed my communication skillset. I did this through having to discuss with my referee partner certain calls and decisions needed throughout the game. I also developed this skill through having to communicate to the coaches certain rules and decisions either my partner or I had made during the duration of the game.
 - I improved my Time Management as well as my responsibility to my employer by understanding and practicing arriving to my work when necessary.
- **Edmonton Scottish Society** 2023 - 2024
Volunteer Youth Coach
 - While coaching I developed my leadership and communication skillsets. I did this through working with children under the age of five and handling the problems or situations they would create. For example having to either tie shoes, run kids to the washroom, and or demonstrating the activities while trying help them perform them correctly and efficiently as well as making sure they were having fun along the way.
 - Here I also developed my problem solving skills either by having to set up drills with a lack or materials or unusual materials we didn't usually work with. I also had to prevent any conflicts from occurring and find solutions for those conflicts if I failed to prevent them. An example of this could be when one kid accidentally kicked another while trying to defend or another rolling their ankle. I would try to calm the children down and have them explain to me the situation while also asking sure they were okay and got what they needed.
